About Me

Software QA Engineer with 3 years of experience ensuring web application quality through functional, regression, exploratory, smoke, end-to-end testing and many more. Experienced working in Agile teams and collaborating with developers and Project managers to deliver reliable software. Hands-on automation experience through personal projects using Playwright, Selenium, JavaScript, TypeScript, and Python.

Skills

- Manual Testing
- Test Automation
- Agile Methodologies
- Team Collaboration
- Analytical Thinking

Core technical skills

Testing

- Functional Testing
- Regression Testing
- Sanity Testing
- Smoke Testing
- Exploratory Testing
- End-to-End Testing
- API Testing
- Cross-browser Testing
- Usability Testing
- User Acceptance Testing
- Test Case Design
- Test Planning
- Defect Validation
- Release Validation

Tools

- Jira
- Git
- GitHub
- Jenkins
- Postman
- Chrome DevTools
- REST APIs

Automation

- Playwright
- Selenium
- Cypress
- Page Object Model (POM) and Test Framework Architecture
- UI Automation
- Test Automation Frameworks

Programming

- JavaScript
- TypeScript
- Python
- SQL
- HTML
- CSS

Methodologies

- Agile
- Scrum
- SDLC
- STLC
- CI/CD

Professional experience

Software QA Engineer

Dilato InfoTech

November 2023 – Present

- Execute functional, regression, smoke, exploratory, usability, and end-to-end testing for web applications, ensuring software quality throughout multiple product releases.
- Design comprehensive test cases and validation scenarios based on business requirements and acceptance criteria.
- Validate new features and existing functionality across multiple browsers and environments to ensure consistent application behavior.
- Investigate software defects using browser developer tools, application logs, and network requests to reproduce issues and support root cause analysis.
- Document defects in Jira with detailed reproduction steps, expected results, and supporting evidence to facilitate efficient resolution.
- Collaborate daily with developers, Product Owners, Business Analysts, and QA engineers during sprint planning, backlog refinement, daily stand-ups, and release activities.
- Verify production fixes through regression testing and contribute to release readiness before deployments.
- Continuously improve QA documentation and testing processes to support software quality across Agile development cycles.

Licensing Brand Coordinator

Mad Engine/Fortune fashions,

April 2022 – November 2023

- Managed licensing agreements and usage rights.
- Coordinated product approvals with licensors.
- Ensured compliance with brand and IP guidelines.
- Partnered with cross-functional teams on licensed products.
- Maintained licensing documentation and regulatory compliance.
